QUALITY & INSPECTIONS

*We take care of
your quality & inspections
needs.*

We solve your outsourcing needs through customized services, such as :

Organizing and implementing second part INSPECTIONS for products, equipment or installations. Inspections performed in-process, previous delivery or as per client requirement.

- Performing QUALITY AUDITS (internal and/or of vendors), audits based on the quality management system applicable and product requirements.
- Assuring all tasks related to QUALITY ASSURANCE and/or QUALITY CONTROL (Coordination or Management).
- As EXPEDITING concerning the supply chain, contributing through a follow-up that the vendor meets PO requirements and delivered on time.
- For the planning, issue, review, and/or approval of product and/or project technical DOCUMENTATION.

Quality and Inspections performs the inspections/controls considering its importance and the client's expectations, more precisely we perform:

- Receiving inspections,
- In-process inspections,
- Final inspection / pre-shipment inspections,
- Visual / measurement / quantity inspections,
- Packing / marking / identification inspections,
- Verification onsite of client requirements,
- Witness of processes qualifications or applicable controls,
- Witness of performance tests,
- Witness of destructive tests,
- Witness of factory acceptance tests (FAT).

Moreover our quality audits are based on ISO-9001 or similar requirements.

Partners

QUALITY & INSPECTIONS works to strengthen its presence in the world of quality and inspections. Partnerships are based on mutual trust, considering a win-win exchange.
